

NICE Actimize to Deliver its “AML Essentials” Anti-Money Laundering Solutions on the Amazon Web Services Cloud

NICE Actimize’s cloud offerings address new markets, and provide high levels of security and service at reduced deployment costs

NEW YORK – April 13, 2016 – NICE Actimize, a NICE Systems business and the largest and broadest provider of a single financial crime, risk and compliance software platform for the financial services industry, announces that it will deliver its recently launched “AML Essentials” Anti-Money Laundering Solution on the Amazon Web Services (AWS) Cloud. AWS is enabling financial services organizations — from startups to the largest global investment banks — to use the cloud to drive innovation and accelerate speed to market.

“Delivering our new AML Essentials on the AWS Cloud enables us to grow our financial crime cloud offerings and address new markets, providing high levels of security and service to our growing customer base, and at reduced deployment costs. By adopting AWS, NICE Actimize is taking a leadership role in how the financial services industry can leverage the cloud to stay ahead of complex regulatory environments,” says Cenk Ipeker, Head of NICE Actimize’s Cloud.

NICE Actimize will present its cloud-enabled offerings at the upcoming AWS Financial Services Cloud Symposium on April 14 in New York. A NICE Actimize-led session will outline the benefits of moving key financial crime solutions from an on-premise environment to a fully deployed cloud software-as-a-service (SaaS) offering, including accelerated go-to-market speed, increased security protocols and optimized data management capabilities.

“NICE Actimize’s migration to AWS demonstrates how agility and product innovation are important levers for banks in fighting financial crime. Using the cloud allows NICE Actimize to focus on building world class applications, while leveraging the global scale, cost efficiencies, and world-class security of the AWS infrastructure,” said Nitin Gupta, Head of Worldwide Financial Services Partners, Amazon Web Services, Inc.
