

Data Services: Consultancy, Sourcing and Acquisition

Delivering the fuel that drives solutions

89% of leaders face data sourcing challenges*

*MuleSoft Benchmark Report 2018, mulesoft.com

Why is data so important?

- Data feeds all financial crime compliance solutions
- Organizations rely this data to remain competitive and compliant

Facts:

- Data is an asset to all organizations
- Data needs to be managed
- Organizations need confidence in the integrity of their data
- Complete and quality data is required to meet regulatory deadlines

Challenges organizations face:

- Sourcing data
- Massive data
- Irrelevant data
- Mapping data
- Transforming data

Why NICE Actimize Data Services?

Clients gain access to an experienced and focused team of experts to achieve transformation goals

- We are the experts of our NICE Actimize solutions' data needs
- We are industry SMEs with regulatory compliance data expertise
- We assist with the source data extraction and validation process keeping project timing on point
- We help overcome challenges and delays to fast forward deployments, goals and value realization
- We help clients meet regulators expectations and mandates
- We provide greater data accuracy which allows for more confident decision making and increased business agility

Data Assessment

Handling the entire data movement life-cycle to achieve organizations' data integration and transformation goals

Industry expert and proven End 2 End full-service provider

Proven two-phased approach with integrity checks at every step ensures all extracted and relevant data is accurately delivered from source systems to NICE Actimize solutions.

Source system analysis

Data mapping & integration approach

Discovery Phase

- Gap analysis and impact assessment clarifying data requirements and impact of missing, irrelevant data
- Determine 3rd party shared data integration needs
- Data flow, source data formats and timing (batch or real-time) to satisfy the data mapping requirements
- Define data transformations
- Data loading processes, validation and monitoring requirements

Data sourcing, validation & integration

Testing & go-live support

Data Sourcing, Data Validation and Integration Phase

- Perform due diligence to ensure clients have the “fuel” to successfully achieve the most from NICE Actimize solutions.
- Develop data extraction, transformation and load utilities to satisfy data integration design
- Perform data validation and correct any issues
- Establish production data processes and monitoring

Bi-directional flow

Bi-directional Flow (Optional Service)

- Integration of detection results to source systems
