# NICE Actimize

GENERATIVE AI SOLUTIONS
## THAT PRIORITIZE DATA PRIVACY AND SECURITY

Generative AI is transforming anti-fraud and financial crime programs—data security, privacy, and governance are paramount.
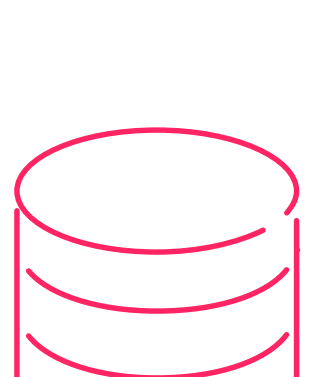

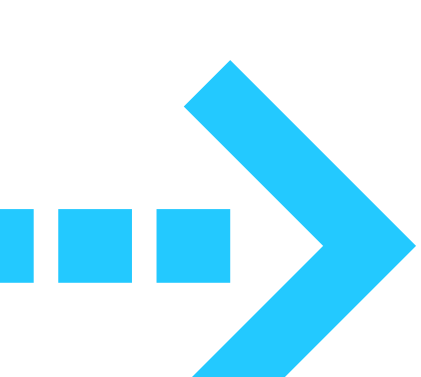

Elements of a Secure Generative AI Approach

Top-Tier Encryption Standards
Ensures the highest levels of encryption to protect data in transit and at rest

Complete Data Privacy
Secures full control over data, which is never shared or exposed externally
Rigorous Data Governance
Implements guardrails for compliance and responsible AI

NICE Actimize prioritizes data privacy, safety, and explainability. This is done with continuous model monitoring, human oversight, and robust failsafe mechanisms to ensure safe, transparent and ethical AI.

How the Secure Generative AI Approach Works
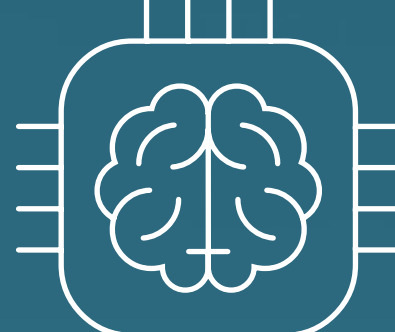

Fast Time to Value • Safe and Secure • No Training
